|               | <ul> <li>(1) inadvertently deleted, (2) inadvertently omitted</li> <li>I inadvertently left my phone at home this morning and felt</li> </ul>                                                                                                                                                                                                               |  |  |  |
|               | lost.                                                                                                                                                                                                                                                                                                                                                       |  |  |  |
| wildlife      | <i>n.</i> animals, birds, insects, etc. that grow independently of people and live in natural conditions                                                                                                                                                                                                                                                    |  |  |  |
|               | (1) wildlife sanctuary, (2) bird and other wildlife                                                                                                                                                                                                                                                                                                         |  |  |  |
|               | The conservation area has an abundance of <b>wildlife</b> .                                                                                                                                                                                                                                                                                                 |  |  |  |
| vital         | <i>adj.</i> necessary for the success or continued existence of something                                                                                                                                                                                                                                                                                   |  |  |  |
|               | synonym: critical, crucial, invigorating                                                                                                                                                                                                                                                                                                                    |  |  |  |
|               | (1) play a <b>vital</b> role, (2) <b>vital</b> for a healthy society                                                                                                                                                                                                                                                                                        |  |  |  |
|               | Perseverance and optimism are <b>vital</b> to success.                                                                                                                                                                                                                                                                                                      |  |  |  |
| ecosystem     | <i>n.</i> all the plants and living creatures in an area and the way they affect each other and the environment                                                                                                                                                                                                                                             |  |  |  |

|              | (1) marine <b>ecosystem</b> , (2) change the <b>ecosystem</b>                                                                                                                            |  |  |  |  |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|
|              | Human conservation efforts often fail unexpectedly because                                                                                                                               |  |  |  |  |
|              | they disturb the balance of the <b>ecosystem</b> .                                                                                                                                       |  |  |  |  |
| invertebrate | n. a class of animals that do not have a backbone; they include insects, worms, and mollusks                                                                                             |  |  |  |  |
|              | synonym: animal, mollusk, worm                                                                                                                                                           |  |  |  |  |
|              | (1) <b>invertebrate</b> species, (2) study of <b>invertebrates</b>                                                                                                                       |  |  |  |  |
|              | Many species of marine <b>invertebrates</b> , such as corals and sponges, are important components of ocean ecosystems.                                                                  |  |  |  |  |
|              | sponges, are important components of ocean ecosystems.                                                                                                                                   |  |  |  |  |
| chain        | <ul> <li><i>n</i>. a series of connected links or objects; a system or group of interconnected elements; a restraint or shackle</li> <li><i>synonym</i>: series, string, link</li> </ul> |  |  |  |  |
|              | (1) chain reaction, (2) supply chain                                                                                                                                                     |  |  |  |  |
|              | The <b>chain</b> on my bike broke, leaving me stranded.                                                                                                                                  |  |  |  |  |
| mite         | <i>n.</i> a tiny arachnid-like creature that is related to ticks and spiders and often lives as a parasite on plants or animals                                                          |  |  |  |  |
|              | synonym: speck, insect                                                                                                                                                                   |  |  |  |  |
|              | (1) house dust mite, (2) a mite of evidence                                                                                                                                              |  |  |  |  |
|              | The <b>mite</b> infestation in the old house was a serious problem                                                                                                                       |  |  |  |  |
|              | for the residents.                                                                                                                                                                       |  |  |  |  |
| centipede    | <i>n.</i> a long, many-legged arthropod of a group of species that are mostly nocturnal predators and typically feed on insects                                                          |  |  |  |  |
|              | synonym: hundred-legger, myriapod, arthropod                                                                                                                                             |  |  |  |  |
|              | (1) the venom of a <b>centipede</b> , (2) tropical <b>centipede</b>                                                                                                                      |  |  |  |  |
|              | I saw a <b>centipede</b> crawling across my bedroom floor, which                                                                                                                         |  |  |  |  |
|              | gave me chills.                                                                                                                                                                          |  |  |  |  |
| consume      | <ul> <li>v. to spend something, especially fuel, energy, or time, in a large amount</li> </ul>                                                                                           |  |  |  |  |
|              | synonym: absorb, ingest, use up                                                                                                                                                          |  |  |  |  |
|              | (1) <b>consume</b> a large of alcohol, (2) <b>consume</b> electricity                                                                                                                    |  |  |  |  |

A smaller car will **consume** less fuel.

| crop         | <i>n.</i> a plant that is cultivated in large amounts, particularly for food                                                                                                                                                                                                     |
